Saves Eggs

Royal Baking Powder makes it possible to produce appetizing and wholesome cakes, muffins, cornbread, etc., with fewer eggs than are usually

In many recipes the number of eggs may be reduced and excellent results obtained by adding an additional quantity of Royal Baking Powder, about a teaspoon, for each egg omitted. The following tested recipe is a practical illustration:

1 cup sugar I teaspoon salt cup cold water

1 teaspeon flavoring

DIRECTIONS:—Boll sugar and water until syrup spins a thread and add to the stiffly beaten whites of eggs, heating until the mixture is cold. Sint together three times the floor, ealt and baking powder; beat yelks of eggs until thick; add a little at a time flour mixture and egg yelks alternately to white of egg mixture, stirring after each addition. Add is cup cold water and flavoring. Mix lightly and bake in moderate oven one hour.

The old method called for 6 eggs and no baking powder
